# San Francisco

- \* The local community in Israel needs continuation.
- \* Awareness needs to be developed.
- \* International contacts should be promoted.

## The Ideas

- \* Promoting young leadership in Israel.
- \* Help young adolescents to cope with specific problems related to hemophilia in this age group.
- \* Assist young people with hemophilia to enroll into the army smoothly and help them to make a real contribution.

## From Ideas to Reality (I)

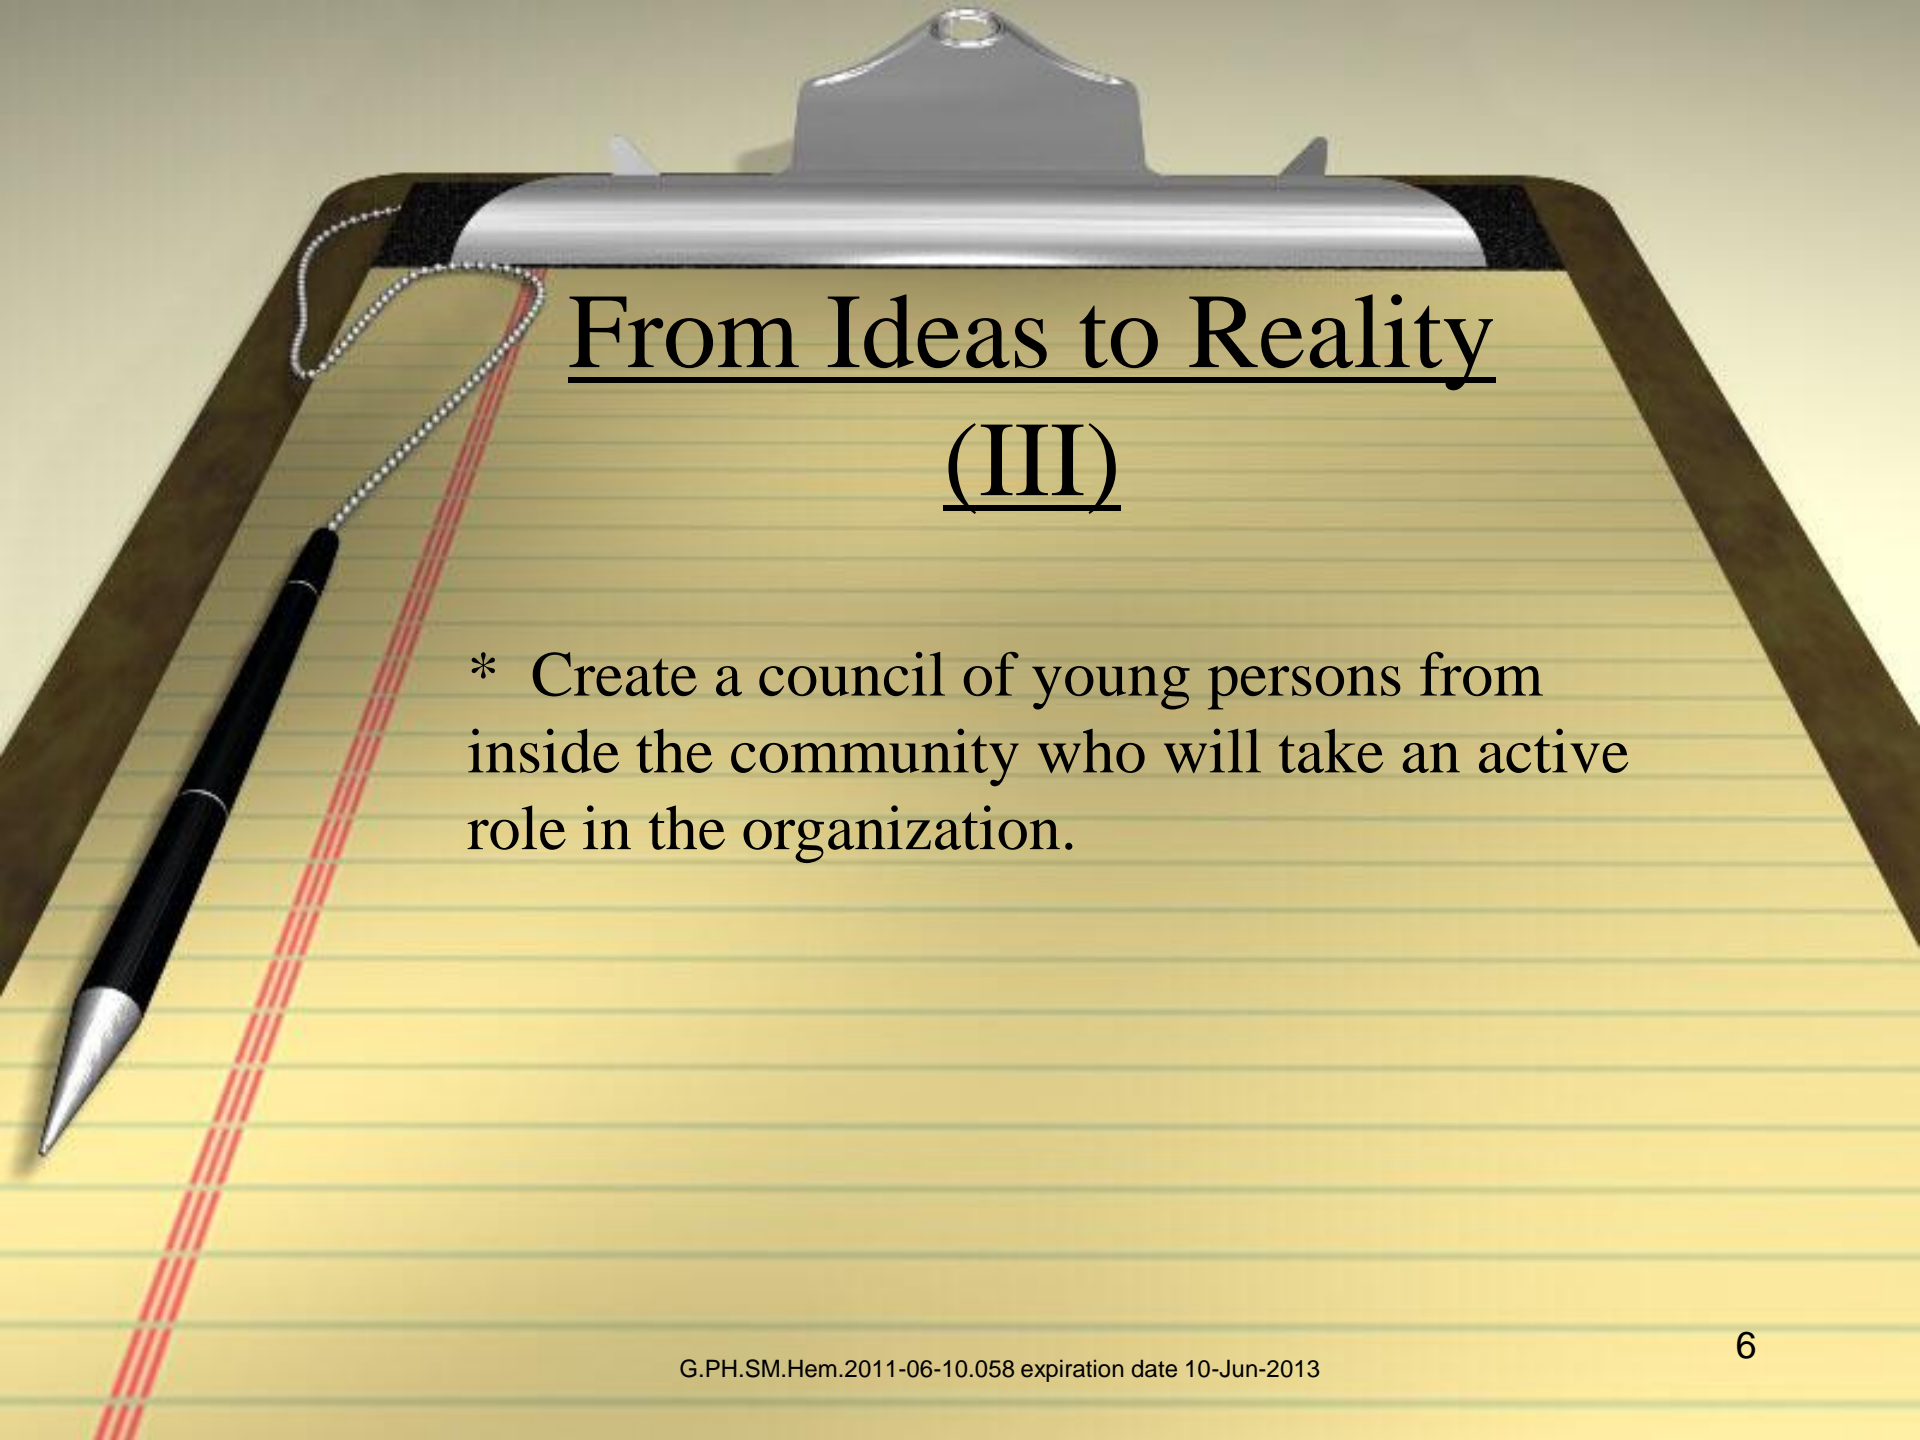

\* How to say to a young person "it is not as bad as you think" and make him believe it?

\* How to get the message through "the disorder has to live with you, and not the other way around?"

## From Ideas to Reality (II)

\* A panel of soldiers with hemophilia will tell their stories first hand, the process they went through and their experiences.

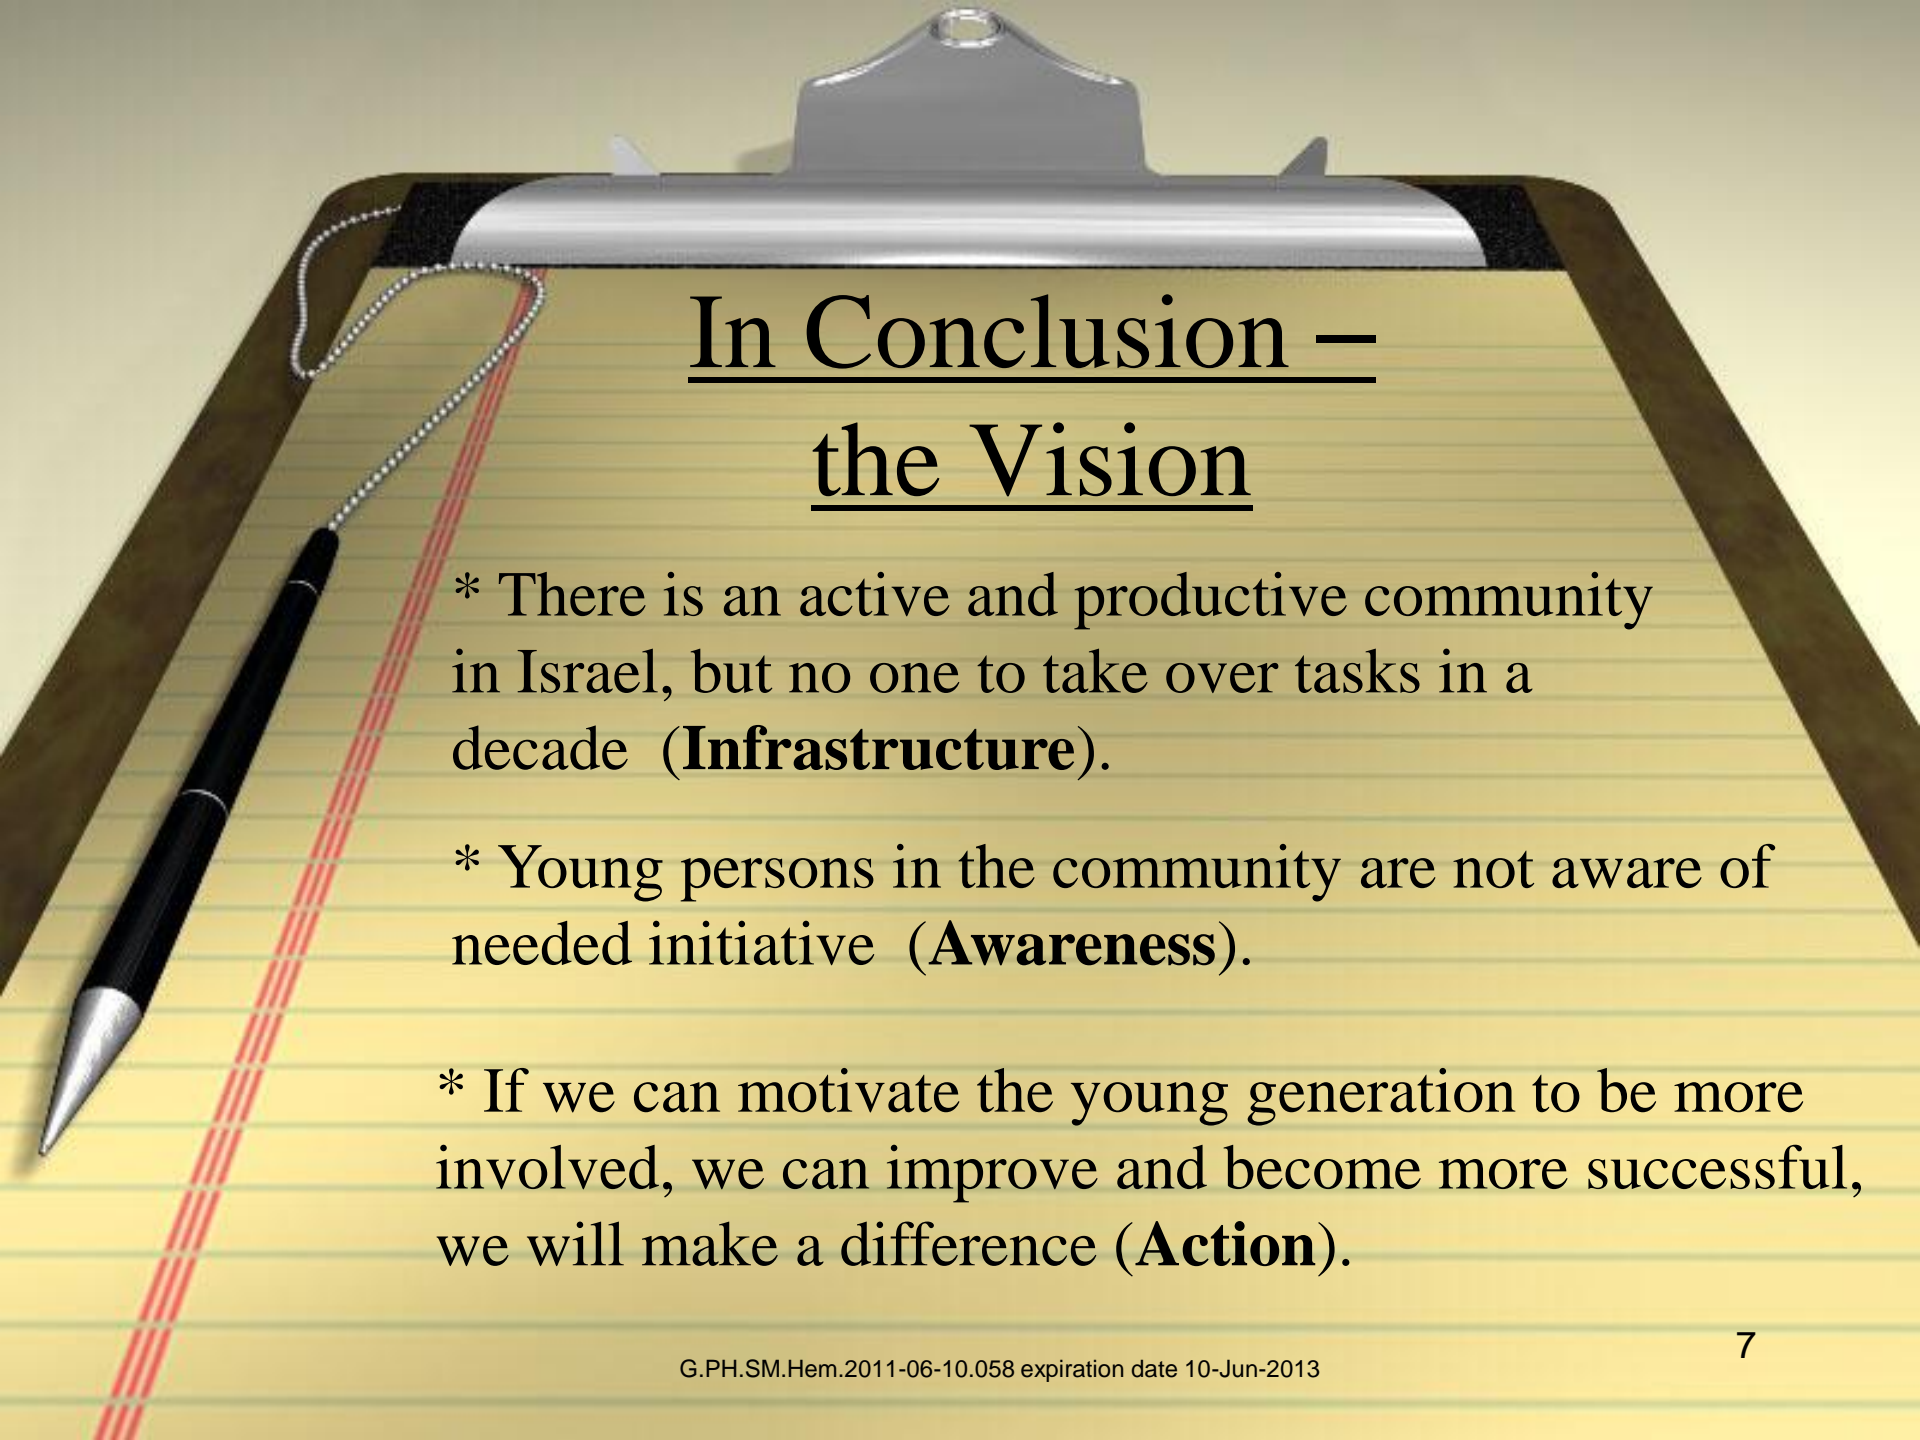

# From Ideas to Reality

## (III)

\* Create a council of young persons from inside the community who will take an active role in the organization.

## In Conclusion – the Vision

\* There is an active and productive community in Israel, but no one to take over tasks in a decade (**Infrastructure**).

\* Young persons in the community are not aware of needed initiative (**Awareness**).

\* If we can motivate the young generation to be more involved, we can improve and become more successful, we will make a difference (**Action**).
